HARDY HYBRID PERPETUAL ROSES

THE Hybrid Perpetuals are considered the most valuable of all roses because they bear the largest, sweetest and most brilliant colored flowers, and are so hardy and vigorous they live over Winter without protection, and continue to bloom regularly from year to year. Their grand flowers are

of all shades of red, crimson, scarlet, pink and white, but no yellows. They thrive and bloom finely in all sections of the country and should generally be planted in open ground as but few varieties are suitable for house culture. Some kinds do not bloom till the second year, but when fully established bloom regularly at the usual time, and occasionally during the Summer and Fall months. Though called "Perpetual," they are not constant bloomers but are the finest and most beautiful of all Hardy Roses.

We offer the choicest and most Beautiful Varieties in Cultivation, and send Strong, Healthy Plants from 2½ and 3-inch Pots all on their own roots. Persons who order at the single rate may select to value of 15 cts. additional on every dollar sent.

Two-year Old Roses EXPRESS CHARGES PAID.

We have an unusually fine stock of Two-year Old Roses this season—fine. large, thrifty bushes, many of them grown in the nursery last Summer and now potted up in best condition for planting out. They will give immense satisfaction to all who get them. They have to be sent by express, but express charges have been reduced 20 per cent. and are now quite reasonable,

and besides this we pack as light as possible and always add a liberal number of Choice Extras, which in many cases will more than pay the charges, so no one need hesitate to order their Roses "sent by express." Can quote price prepaid through when requested.

Two-year Roses weigh when packed about as follows: 12 plants, 20 pounds; 25 plants, 35 pounds; 50 plants, 50 pounds; 100 plants, 75 pounds. This includes the earth left on the roots, which is quite necessary to Roses of this size; if all the earth is shaken off, the plants may be hard to start and slow to bloom; and this is one of the reasons why Two-year Roses should always be sent by express when convenient.

PLEASE NOTICE: All our Two-year Roses are grown in pots, on their own roots, and are fine, thrifty plants, 12 to 15 inches high or more, ready for immediate bloom.

Passion Flower NORTHERN CROSS

NEW PASSION FLOWER, NORTHERN CROSS (Two-thirds natural size)

THIS IS A MAGNIFICENT CLIMBING VINE, grows 8 to 10 feet the first season; begins to bloom at once, while quite small, and continues loaded with its splendid flowers the whole season, from June to November. Handsome glossy green foliage and enormous flowers, as beautiful as they are large, over five inches across, and showing a well-defined raised cross in the center, surrounded by a wonderful halo of fine sky-blue rays, underlaid with beautiful rose-pink and white petals—altogether a rare and splendid flower, sure to attract attention. Too much can not be said in its praise. It is a fine hardy plant, easy to grow and sure to bloom. The most splendid passion flower in existence, and one it is no trouble to have in perfection. Do not fail to include it in your order this season: it will surprise and please everyone. Price, strong plants, 15 cents each; larger size, 20 cts., postpaid.

Southern Beauty

A STRONG. vigorous climbing vine that will run 10 or 12 feet high and make an abundance of pretty leafage and large clusters of handsome flowers shining red, white and blue shades in combination. 15 cts. each.

The Two PASSION VINES for Twenty-five Cents, postpaid

NEW CRIMSON CHENILLE PLANT ACALYPHA SANDERI

THIS cut is a representation of the plant as it really appears, and is not at all overdrawn. It grows 10 to 12 inches high, blooms quickly and abundantly, and the flower tassels grow as long as the plant is high. They are covered all over with fine crimson flowers, looking almost exactly as if made of crimson chenille or silken plush. The plant likes heat and moisture, and good rich soil, but grows easily and blooms so quickly that many are beginning to flower when sent out. When warm weather comes, set out in the flower bed, and it will grow the whole season. A most surprising novelty and a great curiosity. Strong plants, 15, 20 and 25 cfs., postpaid. Extra size, 35 and 40 cts. each, by express.

Blue Flowering Coleus

THIS is a grand novelty from South Africa, and said to succeed well here also. Grows 2 to 3 feet high, has pretty pea green leaves, and bears a great abundance of lovely sky-blue flowers in handsome spikes, which on old plants are sometimes over a foot long and two or three inches around. A grand plant for the flower bed in Summer, and a most constant and abundant Winter bloomer for the house or conservatory. It is as yet quite new and scarce, but we make price as low as possible, and hope our friends will give it a liberal trial. Strong plants, 20c. each, postpaid.

Cissus Discolor BEGONIA

NOT a true Begonia, but an elegant vining window plant, having as richly colored foliage as the finest Painted Leaf Begonias. Has long heart-shaped leaves with a rich metallic lustre. Exquisitely marked in different shades of silver and bronze green, beautifully veined with red, the under side being dark rich crimson. Extra fine for window boxes, vases and pots, and when given a small trellis a foot or two high for support, soon makes a parlor plant of almost unequalled beauty. It likes heat and moisture, and may be kept growing all the time or dred off and rested when desired. Strong plants 15 and 20 cts. each, postpaid.

or, New Flaming Torch Plant

THIS IS A GRAND NEW PLANT FOR THE FLOWER GARDEN, VERY SHOWY AND HANDSOME

ROWS from the root and throws up strong stems 2 to 3 feet high, bearing large clusters of brilliant orange-scarlet flowers in elegant pompons, 6 to 8 inches long and 2 to 3 inches across, as shown in our illus-It can be planted out early in the Spring, and will soon begin to bloom and continue to throw up its gorgeous spikes of splendid flowers the whole season, until the ground is hard frozen. It is quite hardy here, when given a light covering of leaves or garden litter, but further north the roots should be lifted and kept in the cellar over Winter, buried in sand. Early frosts do not hurt it, or keep it from blooming, and it continues as brilliant as ever long after other flowers are gone. It is unsurpassed for cutting, and its grand flame-colored pompons will keep for weeks in water. scarcely be recommended too highly for beds and borders. It is a grand plant in every way. Price, strong roots, 20 cts. each, postpaid.

New Giant-Flowering Caladium

THIS splendid new plant resembles the Caladium Esculentum (Elephant's Ears) in some ways, but is entirely distinct and vastly superior in every respect. It is truly gigantic in size, frequently growing 8 to 10 feet high, with leaves 5 feet long by 2 to 3 feet wide. They are beautifully veined and bright glistening green, shining as if varnished. Begins to bloom when four to five months old, and throws up immense snow-white flowers like Giant Calla Lilies, in constant succession all through the growing season; or, if kept in the greenhouse, will keep on flowering until time to plant out again next season. Plants lifted from the open ground in the Fall will bloom all Winter. The flower buds start from the base of the leaf-stalk, and each one will produce six or eight flowers which will open

in succession. The flowers are pure white at first but soon pass to pale yellow. The fragrance is given out at night and is so rich to paie yellow. The fragrance is given out at night and is so rich and powerful that a single plant in bloom will scent the air for a long distance around. It makes a grand pot plant if given an 6 or 8-inch pot, and may be kept growing all the time or set in cellar over Winter, and planted out as soon as the ground is warm, in Spring. It likes good rich earth and plenty of heat and moisture. It is a very striking novelty for the lawn, and will no doubt be scarce for years.

PLEASE NOTICE:-Our 7 to 9 and 5-inch Fern Balls are grown for us one year in Japan, and though they do not look quite so bright and clean as when freshly made up, they are considered much better because the roots have become established, and are in condition to start quicker and make a more vigorous growth, and when kept thoroughly dampened, in a moderately warm room, will soon be covered with a handsome growth of lovely emerald green fronds as shown in the illustration.

C. & J. VELVET GREEN LAWN GRASS SEED.

THE BEST BRAND FOR SEEDING DOWN NEW LAWNS AND RENOVATING OLD ONES.

OUR VELVET GREEN LAWN GRASS SEED is not excelled by any for producing a smooth, even, velvety-green OUR VELVET GREEN LAWN GRASS SEED is not excelled by any for producing a smooth, even, velvety-green sward that will withstand drought and hard usage, and always makes a handsome appearance. In seeding down a lawn or grass plot, three things are necessary to insure success: First, to prepare the ground so as to have a fine, smooth seedbed; second, to put on plenty of seed; never less, but rather more than the directions call for; third, to start the lawn-mower as soon as the weeds (which are always in the ground and sure to start first) are tall enough to catch, and keep them mowed off close till the grass has time to start and become well established. The seed should be lightly raked in and finished with a roller. Apply any good commercial fertilizer as a top-dressing when needed. One quart of seed is enough for three hundred square feet (fifteen by twenty feet), or at the rate of five bushels to the acre. Lawns should be kept neatly mowed, which induces a clean, even growth of fresh lively green.

Price by mail, postpaid 25 cts. per quart; two quarts for 45 cts.; in bulk, purchaser paying express charges \$1.25 per peck; \$4,00 per bushel of 20 lbs.

ROYAL PURPLE STROBILANTHES

Introduced by THE CONARD & JONES

A Convincing Bit of History

our Beautiful Canna Lilies are the most satisfactory plants one can use for producing a gorgeous display of brilliantly colored flowers all Summer long. They are now extensively planted in the finest public parks and home lawns. When first grown in our grandmothers' gardens the Canna was known as the "Indian Shot Plant," but then its flowers were too small to attract attention. Later, Europe sent us kinds with larger flowers—but they were not well suited to our climate. About a dozen years ago, the Vice-President of our company, and our veteran rose-grower, Mr. Wintzer (see photo. above), became convinced that by careful hybridizing, the Canna could be made to produce larger flowers and more brilliant colors that would stand our hot suns and whipping winds. We regret that lack of space forbids details, for the process of originating a new flower is a fascinating story in itself. How much we have done in producing for America a NEW RACE OF CANNAS, superior in every way to the old, may be read on the Canna pages of this or any other up-to-date catalogue. We have introduced more than 50 excellent kinds, including the richest reds, the purest yellows and prettiest pinks, and in fact the best in all shades. This year we crown the list of our introductions with the New White Canna, "MONT BLANC." Each year we devote a large area to testing new varieties, We grow the best, discard the rest. We are Canna specialists. There are other good Cannas which we can supply you, but if you want the best sorts to stand the storms and bloom the brightest, always order C. & J. Originated and Introduced by The Conard & Jones Company

THIS MAGNIFICENT NEW CANNA is the result of many years of careful Hybridizing, and we now have the pleasure of introducing the FINEST WHITE CANNA in MONT BLANC has a vigorous constitution and produces its large beautiful white flowers on strong branching stalks well above the foliage. IT BLOOMS EARLY AND CONTINUOUSLY in the greatest profusion during the whole growing season until stopped by freezing weather. Its foliage is bright glossy green, very large and handsome, and so thick and leathery it is not often injured by rain or wind. It is a strong-growing, vigorous variety, and will produce from FIFTEEN TO TWENTY FLOWER STALKS IN A SEASON. Its great masses of snowy-white flowers contrast finely with the splendid crimson and pink

varieties, making the most gorgeous and showy flower beds for the lawn or garden it is

NOTE. All Cannas we send out, both Dormant Roots and Potted Plants, are ready for planting at once, as soon as the ground is warm and weather settled, but if received earlier than this, they should be grown in pots or boxes in the house till time to set out, as they cannot bear much cold. See cultural directions sent with every order. They grow very easily, and our Dormant Roots with proper treatment will bloom nearly as quick as the Potted Plants. Please notice however that Dormant Roots can only be furnished up to May 1st. After that time we will have Potted Plants only, and when Dormant Roots can not be sent, we will send equal value in Potted Plants. It is always best when convenient to have potted Cannas sent by express so that some earth can be left on the roots, and as we make a special reduction to those who order sent by express, it costs very little more, and is the best way for started plants.

Ready-made"

FOR a gorgeous display of the most brilliant colors all Summer long and until late Fall, there is nothing can equal the Canna; and there is no way in which Cannas can be more effectively and satisfactorily used than when planted together in large rows or beds. As sizes range from 2 to 5 feet, and colors include some 40 different shades, it is important to select for this purpose kinds that look best together. For the convenience of our customers, therefore, we here offer a few carefully chosen collections. For the size and price of beds named, we believe the arrangements we suggest will produce the finest effects in Canna beds it is possible to obtain. Plant any of these combinations and you will be surprised and delighted with the result. Full directions "HOW TO PLANT" will be sent with each order.
